

What is your name?

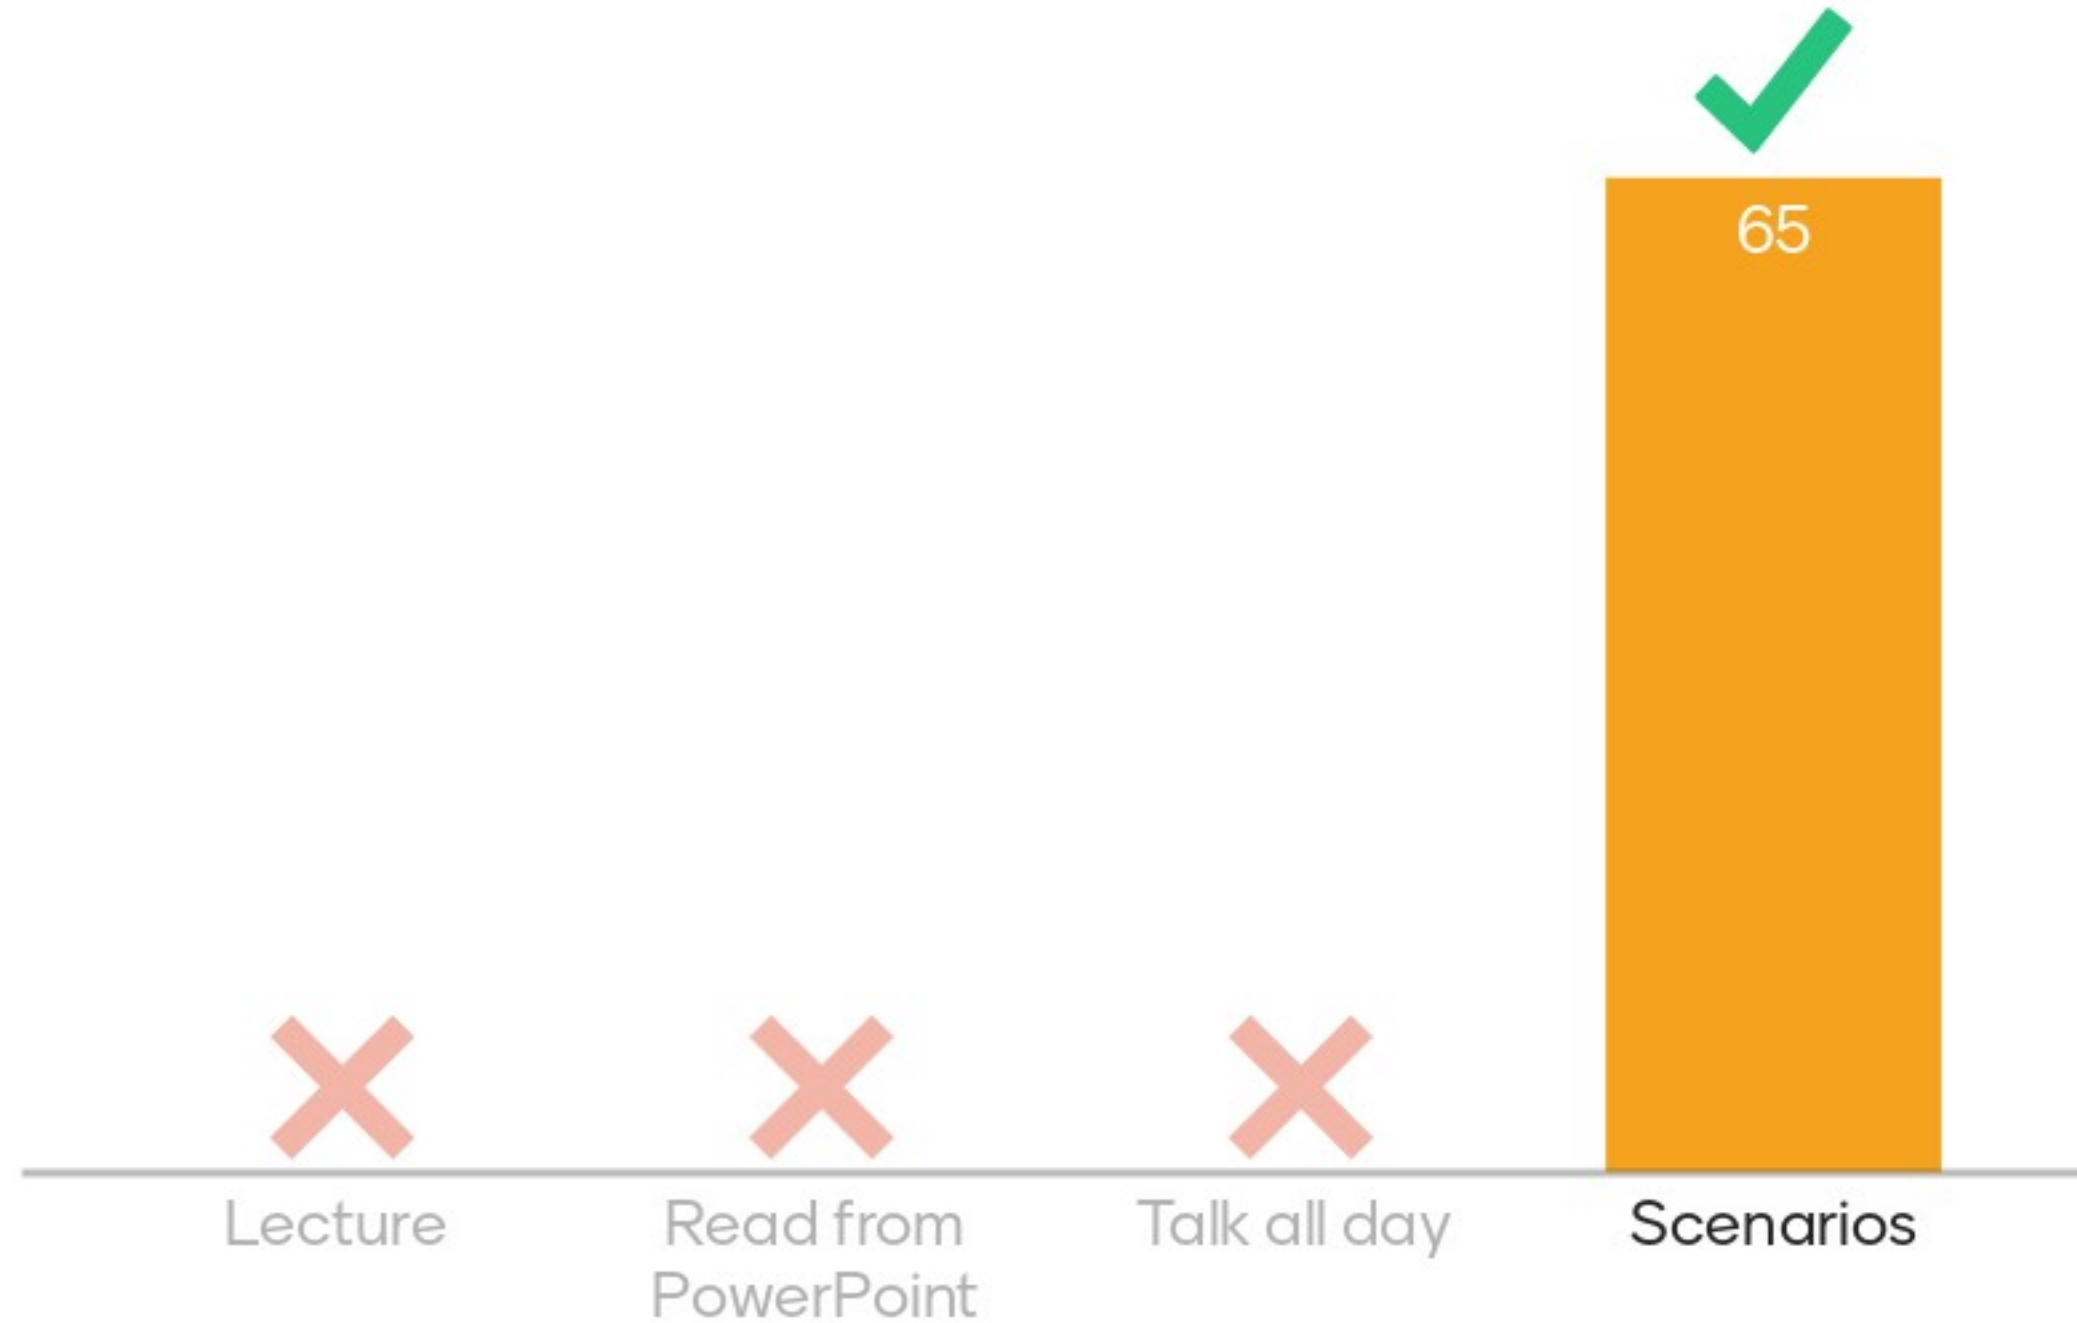

Microlearning helps to:

To integrate microlearning, reduce __ and integrate activities ("practice").

Which activity incorporates active learning?

Results

Do you have any questions?

thanks!

i appreciate your expertise

Will share the slides and links

Do you have recommendations of how to develop online simulations?

Good information

Activities in virtual workshops ideas please?

How many sessions are the best for one day

How do motivate large health systems to use these techniques!?

How big of a group do you recommend for this level of training and how long of the sessions do you recommend

Do you have any questions?

Can anyone use menti?

Does microlearning work when attendees may speak different languages

Thank you. I just wanted to know about resources but you are sharing that with us.

Is there a preference for small standalone courses vs more comprehensive courses with micro topics?

Is menti.com available for use with my team?

do you have recommendations for LMSs?

Does your website show examples And teach us how I can develop lessons like this?

Will we get a attendance certification? Thanks

Best time I have had ALL DAY!!!

Do you have any questions?

Can Micro-Learning technique be used for regulatory requirements?

Does your team have a system to assist EHS officers to keep track of training and required CalOSHA courses

Do you see recordings of past trainings useful for those that may have missed a micro learning session?

Do you always use pre- and post- tests?

Agreed that Problem based learning and role play/scenario are great for learning but often times people don't enjoy role play...how to motivate people to participate?

Great info
